## PERSONAL PROJECTS

E-Commerce Application [🔗 https://joyce-e-commerce.netlify.app/](https://joyce-e-commerce.netlify.app/)

**Technologies Used : React Js , Node Js , Mongo DB , Redux , Material UI , Stripe , Crypto Js**

An E-Commerce Application: featuring, User registration, User Login (Password encrypted using Crypto Js), product addition, product filter based on color size and prize, Add to cart, Checkout the items with delivery address and payment Process. User can register by themselves and can purchase the products. User can pay the amount via online payment using credit and debit cards.

Video Chat Application [🔗 https://joyce-zoom-clone.netlify.app/](https://joyce-zoom-clone.netlify.app/)

**Technologies Used : React Js , Node Js , Express Js, Socket io**

A Video Chat Application: featuring , Generate meeting id , Share meeting id, Make connection by meeting id , Accept/Reject the call and. end meeting. It is an one to one video chat application. User can generate the meeting id to connect with his/her friend. The user can join the meeting with shared meeting id.

Memories Application [🔗 https://joyce-memories-app.netlify.app/](https://joyce-memories-app.netlify.app/)

**Technologies Used : React Js , Node Js , Express Js, Mongo DB**

A Memories Application: featuring , Adding Image with title and tags, Allowed edit and delete operations. Images are stored as a base64 format in the database. User can add their images with tag and title as like social media timeline.

Customer Waiting List Management  <https://joyce-referral-url.netlify.app/>

**Technologies Used :** React Js , Node Js , Express Js, Meterial UI , Mongo DB, BCrypt Js

The Customer Waiting List management Application: featuring , User Registration, Login and Share the application. Basic idea of this application is to manage the waiting list of the customer. If a customer register for the product which is not available in the stock, the waiting position of the customer will displayed after the registration. And then the link will be auto generated to share with their friends to register that product. If that shared link is used for the registration the waiting position of the customer will be reduced.
